

Expo Popup Counter

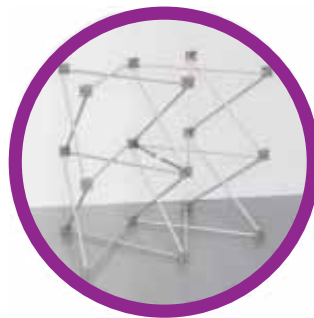

This impressively built portable counter is simple to construct with plenty of storage space and is as much at home in a reception area as it is in a busy exhibition hall. The hinged laminate wooden top (available in beech, white or black finish) is used for counter display and storage is provided by the four internal shelves. The display is then completed by magnetically wrapping your branded graphic or loop nylon fabric panel around the structure. Quick and easy to assemble the popup counter is lightweight and can be effortlessly carried in the trolley bag provided.

- Easy to transport carry bag with wheels
- Quick and easy to setup using the same method as popup display systems
- Four internal shelves which easily bear weights up to 12.5kg each have useful storage space to keep brochures or samples
- Wooden table top is hinged for easy setup and can bear weights up to 70kg
- Graphic or fabric panels attach to the magnetic struts using magnetic tape

Dimensions and weight: height = 903mm - width = 1385mm - depth of counter = 535mm - weight = 29kg approx

The popup counter is easy to setup. Just lift the popup structure and affix the magnetic struts. Insert the 4 internal shelves into the framework and position the hinged folding table top on the structure. Complete your counter display by magnetically wrapping the graphic panel around the structure. The display is transported in the trolley bag provided.

Lead time 4-5 days from receipt of order and graphic approval.
